

The PACS Suite is a premier software that can scale with your needs and help you efficiently manage and streamline your appraisal and tax collection processes.

PACS Appraisal Software

We designed and built the PACS Appraisal software as one of the most powerful in the industry. We loaded the application full of functionality normally done outside the system. You have the ability to value using cost income and market approach while also being able to value multiple types of properties including real estate, personal, commercial and industrial accounts in one database.

User-Friendly Design

We developed PACS Appraisal to help streamline your entire process and include the features you need to get more done in less time.

State Compliance and Reporting

Every state has its own compliance and reporting requirements that can result in a lot of time and resources to file correctly. You can coordinate values from different applications, and your team can send information between users to review and verify information in real-time. Since PACS is a state-compliant application, we will keep your software updated with new legislative mandates. You can rest assured that our system complies with your state requirements.

Mass Updates

Your team can update parcel information in mass effortlessly, and future reviews can undo past information if original changes are deemed to be done in error. This means that you and your team can make large data changes in a safe and efficient manner.

PACS Collections Software

Your software for efficient and accurate collections for any tax office.

The tax collection process is an essential activity for any tax office. Your team needs a process to help automate the collection, auditing and disbursement of property taxes and fees. PACS Collections is developed with your team members in mind because our software will make the process for tax collection more efficient and accurate.

Multiple Payment Processing

PACS Collections is designed to help your team work efficiently, and this is accomplished by distributing payments into base tax, penalty, interest, and attorney fees based on how each payment is posted.

Electronic Payment Import

Professionals need to handle numerous payments from mortgage companies, remittance/lockbox centers, and tax service agencies.

Audit & Tracking

PACS Collections comes with daily, monthly, and annual audit report and tracking capabilities for all major events occurring throughout the year.

Levy Management

Your team can track, edit, and share information with advanced levy management capabilities.
