

What is HG Mobile?

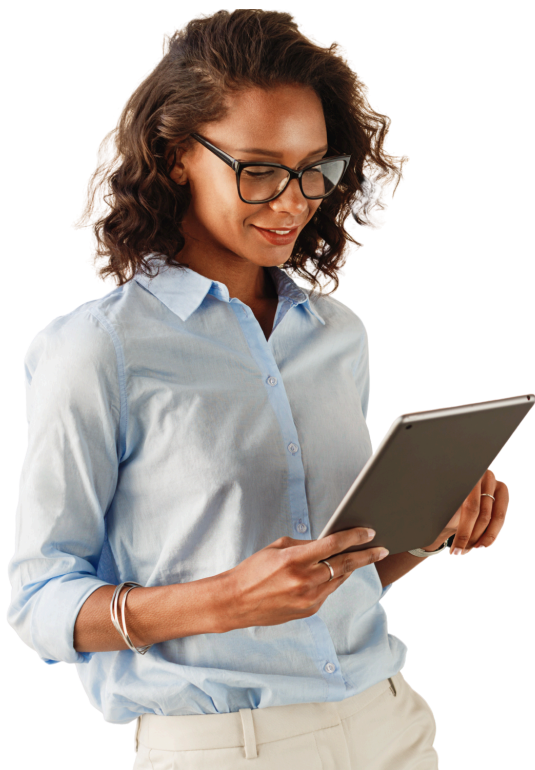

We've completely changed the face of mobile data collection with this innovative and field proven solution.

All data changes are made available to office quality control modules in real-time, saving you time and money by correcting costly mistakes before they are made public.

For each change made, HG Mobile keeps track of the who, what, when and where providing for unparalleled transparency and safety for your staff and property owners.

HG Mobile offers everything your field appraisers need, such as advanced mobile data collection, efficiency, and unmatched reliability while in the field.

Mobile Data Collection that's Effective and Proven!

- ✓ Update data without any delays
- ✓ Automated GPS & address routing
- ✓ Easily configured to your needs
- ✓ Easy touch screen sketching
- ✓ Eliminate redundant data entry
- ✓ Real time photo acquisition and delivery

MobileAssessor Add-Ons

Advanced Maps

Get the Most out of your DataCloud investment

Advanced Maps is an optional configuration offering a variety of GIS integrations with third-party providers. With on-the-fly, thematic parcel shading based on database attributes, Advanced Maps simplifies data consistency and accuracy checks.

- ✓ Ability to cache new street layers
- ✓ Future MobileAssessor GIS/map enhancements
- ✓ Google imagery + base layer
- ✓ OpenStreetMap imagery + base layer
- ✓ Seamless oblique integration (including Eagleview, NearMap and others)
- ✓ Thematic mapping based on database attributes

Disto Laser Sketching

Streamline Fieldwork, Elevate Precision

Revolutionize your property assessments with Disto Laser Sketching, a cutting-edge tool designed to overcome common field challenges and enhance efficiency.

Disto Laser Sketching streamlines your fieldwork, ensuring precision and safety, even in challenging environments.

Grade Calculator

Consistent Grading for Accurate Assessments

Remove the guesswork from setting grades with a solution that is configured and calibrated to match your existing grade and quality options. With Grade Calculator, users simply select from a drop-down menu to mitigate human subjectivity from setting classes, grades and quality. Grade Calculator uses objective data obtained from component questions to assign grades in an accurate, consistent and explainable manner.
